Your Majesty,

May I present attached on next 6 pages, copies of a petition from British in Munich Germany, signed on paper, plus a list of 24 signatures via web <http://www.berklix.uk/queen/> (confirmed by response passwords; I know most; all believed British).

700,000 British in the EU outside the UK were denied votes on Brexit, (near all remainers); + 3 million globally; + 2.1 million in the UK were too young to vote (more remainers); + 1.5 million elderly died (mostly leavers).

The 2 party whip system brought chaos to the cross party Gordian knot of Brexit.

Please dismiss your prime minister May & appoint a PM from any group

- To form a government of national unity.
- To ask the EU for an extension for a referendum.
- To empower the Electoral Commission to swiftly penalise lies & illicit media funding.
- If an extension is not agreed by UK & EU until too near a chaotic Brexit, To unilaterally revoke Article 50, obtaining a rolling 2 years to re-plan Brexit better, re-serving article 50 later if UK wants it, but only after competent planning.

Yours sincerely, Julian Stacey
